

## Dinner at the Hervey Boat Club, Fraser Room

- 6.30 pm for 7.00 pm start :- Smart casual dress

Graeme Brooke 3D Visualisation “ VizMAP is in the business of *graphically* showing what *geographically* exists and/or what is proposed. It is the “out of window” experience which captures the imagination of those who otherwise “might not get it”.

## About the conference

The main aims for the conference...

1. To promote the involvement of “young” people within the respective professions;
2. Highlight GIS practises in council, cooperate business and the survey office
3. Bring delegates up to date with DERM initiatives
4. To provide some ideas for developing or selling a business  
(David Wolridge - Summit Partners)

*"Summit Partners have been working with the Institution of Surveyors NSW and a number of ISNSW members for the past 4 years in an effort to lift the profile of the profession and help our members develop and grow their firms. From the presentations given and clear feedback from our members, the results have been very favourable. I can highly recommend them."*

## Conference Displays

Position Partners, Measuretek, LISTECH, C.R. Kennedy

Laser Survey Solutions, Endeavour Foundation
